

Why This Kenyan-Based Design & Build Firm Moved to Revit

David Owino
BIM Manager, Revit User | @David Owino

About me

- I am a BIM Management enthusiast with a Bachelor's Degree in Civil Engineering from The Technical University of Kenya .
- I have 5+ years of working experience in Civil/Structural and Architectural Projects in Africa and the Middle East.
- I am a self trained Revit user and BIM Manager.
- I have worked in numerous infrastructure projects with special interests in BIM Management, construction site supervision, management of projects issues including project reporting, I am skilled in carrying out project quality assurance, quality control, implementing and ensuring quality management systems are implemented on projects, Project coordination and project inter-discipline collaboration, 3D structural, architectural modelling and Detailing.
- I am an Autodesk Foundation Tech Lead Development Fellow with a great appreciation for Building Information Modeling.

About me

- My family lived in a government agricultural research institution in Kisumu-Kenya. I grew up seeing research and engineering on a daily.
- I was exposed to advanced technology at such a young age. This compelled me to appreciate engineering as I grew up.

Who this is for

- Landscape Architects looking for better ways to collaborate with other teams in AEC Industry.
- Civil/Structural Engineers looking forward to begin working on Revit.
- BIM Managers for Startups and well Established Architecture, Engineering and construction firms.
- Business leaders who are looking to build efficient, multidisciplinary, collaborated workflows that promote timely project delivery within budget.

Learning Objectives

- Improve online multidisciplinary project collaboration and data communication.
- Reduce time spent during design to maximize on design cost saving.
- Implement coordinated clash detection between various project disciplines.
- Estimate project cost from Revit Models.

Why I am Passionate about Revit!

- Parametric modeling
- Automated database
- Coordination
- Collaboration
- Scheduling
- Documentation
- Energy analytics

The screenshot shows the Revit ribbon menu at the top with various tabs like XXXX - COVER PAGE, Floor Material Takeoff, _InsightLighting Floor Schedule (selected), _InsightLighting Room Schedule, Door Schedule, and Lighting Fixture Schedule. Below the ribbon is a dialog box titled <_InsightLighting Floor Schedule>. Inside the dialog, there are several informational text blocks and a detailed table.

Custom Analysis Whole Building Results: -1.54, 37.26

9/21 9am: 91% & 9/21 3pm: 85% & both: 81% of points are between 0.0-2500 lux (0.0-232 fc)

Solar Values (W/m²): 9/21 9am GHI: 523, DNI: 728, DHI: 75 & 9/21 3pm GHI: 365, DNI: 421, DHI: 40

Name	Floor Area Included in Daylighting	Total Floor Area	9am threshold results						3pm threshold results						Both time results		
			within threshold		above threshold		below threshold		within threshold		above threshold		below threshold		within threshold		
			%	Area	%	Area	%	Area	%	Area	%	Area	%	Area	%	Area	
L00 Ground Floor		166 m ²	178 m ²	91	151 m ²	9	15 m ²	0	0 m ²	85	141 m ²	15	25 m ²	0	0 m ²	81	134 m ²

What event caused BuildX Studio to consider moving to BIM?

- Need to create realistic parametric models that reflected accurate designer intention.
- With a lean team as a start up company BuildX needed to maximize on revision automation to reduce time spent on projects as was the case.
- There was need to have a platform where Engineers and Architects would work together in a collaborated and coordinated environment with proper data documentation.
- The office was struggling with workflow inefficiencies that could easily be solved while Working on Revit.
- There was need to run various simulations such as energy analysis, spatial coordination with respect to the site conditions which could not be achieved using traditional 2D Drafting the team was already familiar with.

Problems BuildX Studio had, that the design team hoped BIM might solve and opportunities the team hoped that BIM might unlock?

Climate Change Mitigation

Quality of Life and Well Being

Inclusive Design & Construction

Could BuildX measure the effect of those problems/opportunities?

The scope of works involved to achieve BuildX Studio Designs ethos that is designed to maximize impact: Buildings that are net zero carbon, more equitably designed, and enhance quality of life and wellbeing. There was always a delay in every scope of work involved due to working on non collaborated workspaces

PROCESS

Pre-Design

- 0. Strategic Definition
- 1. Preparation & Brief

We start by working with you to identify the Business Case, Project Objectives, Strategic Brief and other core project requirements.

Design

- 2. Concept Design
- 3. Developed Design

We develop exceptional design solutions which are founded on human-centred principles and prioritise environmental performance, functionality and local resources.

Build

- 4. Technical Design
- 5. Construction
- 6. Handover & Closeout
- 7. In Use

We offer a trusted service, based on transparency and strong communication, delivering an end product perfectly aligned to your objectives and vision.

How did BuildX go about assessing Revit as a BIM tool?

This was achieved through a pilot project called Zima Homes

Aerial View

Lounge

Bedroom

Courtyard

What BuildX Studio stakeholders thought of the project? (AutoCAD users, as well as non-CAD users such as company owners, project managers)

- *'David how have we been working all along. Working on a Cloud hosted Revit model is so efficient'*
- BuildX management considered getting the rest of the design team trained on Revit to facilitate the migration.

What were the results of Revit assessment?

Design Office

- Diversity in Designing
- 3D Modeling
- Time and Cost Efficiency
- Collaboration Abilities
- Outstanding Parametric Data

External Services

- Improved Collaboration
- Reduced Design Time
- Elimination od Design misinterpretation

What was the team surprised by?

Working on Revit introduced the team to Architecture, Engineering and Construction Collection tools that solved a number of design challenges the team faced in the past.

- Dynamo Studio
- Insight Energy Analysis
- Navis Works
- BIM Collaborate Pro
- ReCap Pro
- Robot Structural Analysis Professional

What did you do next, to migrate the team to Revit?

- Evaluation of design team software competency level.
- Isolate the design team into different groups for training delivery.
- Identify the appropriate Revit courses relevant for the design team.
- Partner with the professional trainers to deliver the courses.
- Implement supervised work based software learning.

BUILDX STUDIO

What did you do next, to migrate the team to Revit?

Pro Bono Consulting Engagement

Autodesk / BuildX Studio Final Handoff

September 2021

Rachel Rosenkrantz
Christina Batelli
Margaux Grandon
Romeo Sanches

What did you do next, to migrate the team to Revit?

Tech workstream deliverables

- ✓ Identify highest priority technical gaps
- ✓ Determine needed skillsets
- ✓ Establish training sessions with Autodesk authorized training partner
- ✓ Follow-up actions
- Detailed *Training Plan* is in PDF format

What did you do next, to migrate the team to Revit?

TECHNICAL GAPS	SKILLSET	TRAINING PLAN	FOLLOW-UP ACTIONS
----------------	----------	---------------	-------------------

Gap Assessment

Focused Departments

Main Contact:
David Owino

Engineering
Design
Drawing and Drafting

- ✓ 17 topics (about 5 per department)
- ✓ 7 sessions to clarify/explore/define needs and solution

- ✓ Address gaps with:
 - Available documentation
 - Recommended software (not only on Autodesk portfolio)
 - Training plan
 - Trial access

What did you do next, to migrate the team to Revit?

The training

Revit trainings were done by SYMETRIADDNOTE GROUP coaches as the official facilitators of the program.

Courses covered include;

- Revit Arch Essentials Plus
- Revit for Project Managers
- Revit Arch Beyond the Basics
- Revit Collaboration
- Revit Structure Beyond the Basic
- Reinforced Concrete Detailing

How we measured success and how the benefits compared to what I thought we might achieve when we set out?

1. Improve online multidisciplinary project collaboration and data communication

The screenshot shows the Autodesk Construction Cloud Document Management interface. At the top, there's a header with the Autodesk logo, 'AUTODESK Construction Cloud', 'Document Management', a user icon, 'X2001_Zima', and a dropdown menu. Below the header, there are four tabs: 'Folders' (which is selected), 'Reviews', 'Transmittals', and 'Issues'. Under the 'Folders' tab, there's a 'View by' section with 'Folders' and 'Sets' options. The main area displays a hierarchical folder structure under the 'Plans' category. The 'Plans' category has a single child folder, 'Construction Information'. The 'Project Files' category has several sub-folders: '01-WIP', '02-Shared', '03-Published', '04-Archived', '_Comms', '_Federated Model', '_Legal Docs', '_Management', '_Shared', and 'XX Developed Design'. Each folder is represented by a small icon and a folder name.

- The design teams were now able to work on Central Model Revit files hosted on cloud.

2. Reduce time spent during design to maximize on design cost saving

This is shown in a short video below

3. Implement coordinated clash detection between various project disciplines

High level clash detection on Revit helped the design teams to effectively identify, inspect, and report interference during the design and construction work stages.

There was an improved detection of clashes on between structural and MEP models.

4. Estimate project cost from Revit Models

Pitfalls, problems, unexpected glitches where there along the way

The pitfalls were in three sectors;

1. People
2. Equipment
3. External Services

Lessons learned? What might we do differently next time? What advice can I give to someone else going through the same process?

- Lesson learned: Migrating to Revit should not be seen as a war between AutoCAD and Revit.
- What we might do differently: Assign a resource to BIM Management.
- Advice: Revit is as good as the person working.

What's next for BuildX?

- One Revit at a time for a future collaborated BIM Environment.

What's next for David?

Buildings are not only done by **Architects and Engineers**, there are multiple users in the workflow for a project to be realized. My joy is bringing all the players into a coordinated work environment.

Transition from **BIM Level 0** – Low Collaboration to **BIM Level 3** – Full integration is here with us. Let's embrace it.

BIM IS WHAT I DO
