

Data-Driven Occupancy Load Workflow Using Revit

EvolveLAB Code Tools

Clara Fonte Boa
Design Technologist | EvolveLAB

Jim Greve
BIM Manager | EvolveLAB

Who are we?

EvolveLAB

- Automation & Interoperability Products
 - Helix, Glyph, EvolveGD, etc.
- Custom App Development
- BIM Support & Training
- Computational Design

**“Helping Architects,
Engineers, and
Construction
Professionals implement
Design Technology”**

Clara Fonte Boa

Design Technologist | EvolveLAB

- Universidade Federal de Ouro Preto, Brazil
 - 5-year Bach in Architecture, Urban Planning and Landscape Architecture.
 - 1-year at Dessau Institute of Architecture, Germany.
- 7 years Architecture
- 3 years as Design Technologist
 - BIM Management
 - Dynamo and light coding
 - UI/UX Design
- Lego Builds & Pottery

Jim Greve

BIM Manager | EvolveLAB

- 20 Years Design/Production Experience in the AEC Industry
 - CAD Tech to BIM Manager
 - Architectural Design
 - Multi-Discipline Design
 - Terrestrial LiDAR Specialist
 - Autodesk Recap
- BIM Management
 - Training
 - Client Relations
 - BIM Consulting
- Music Gear

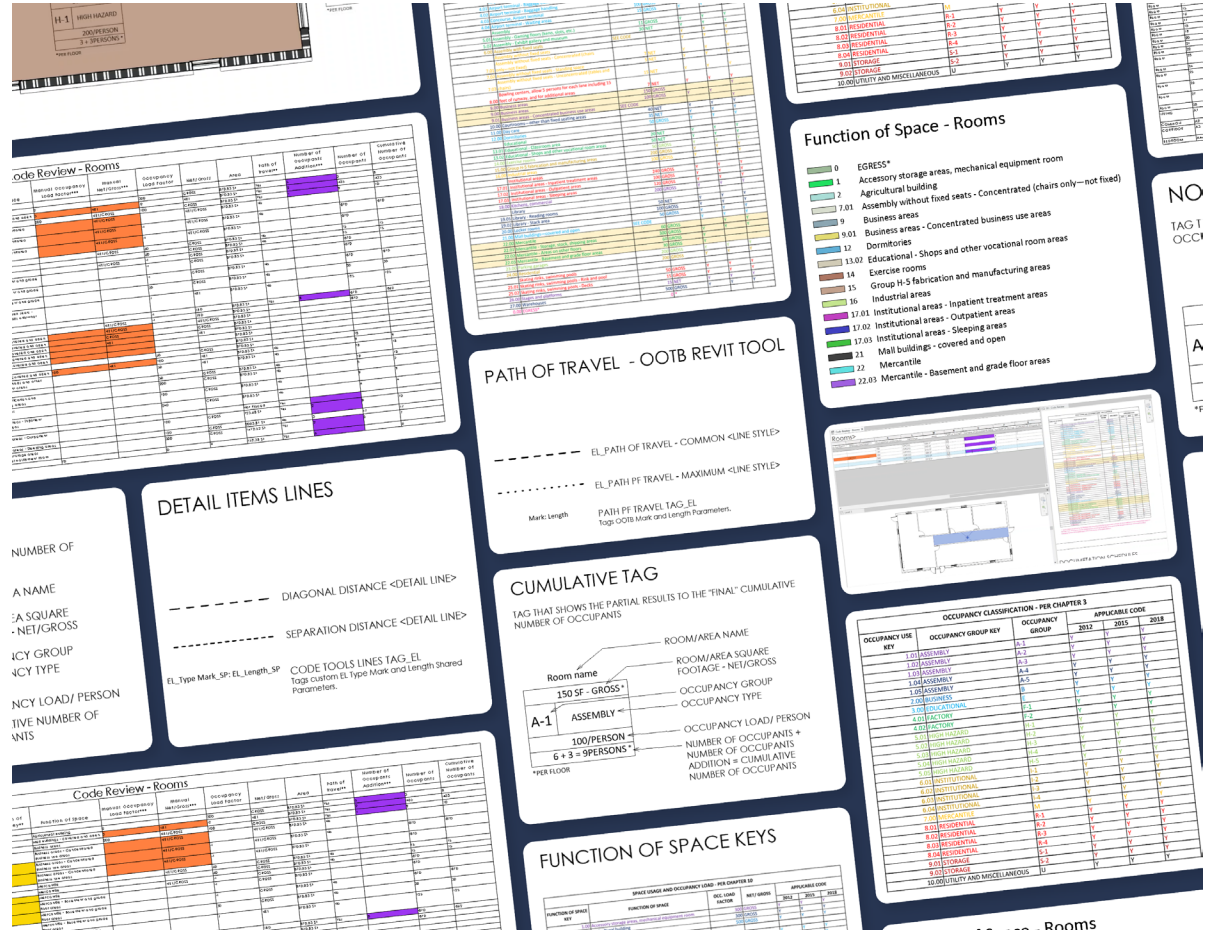

Why are we here?

What are the Code Tools?

- Automated Code Analysis
- Occupancy Classification:
 - IBC, chapter 3
- Number of Occupants Calculation:
 - IBC, chapter 10
- Out of the Box Tools

Fabric

How do the Code Tools use Revit?

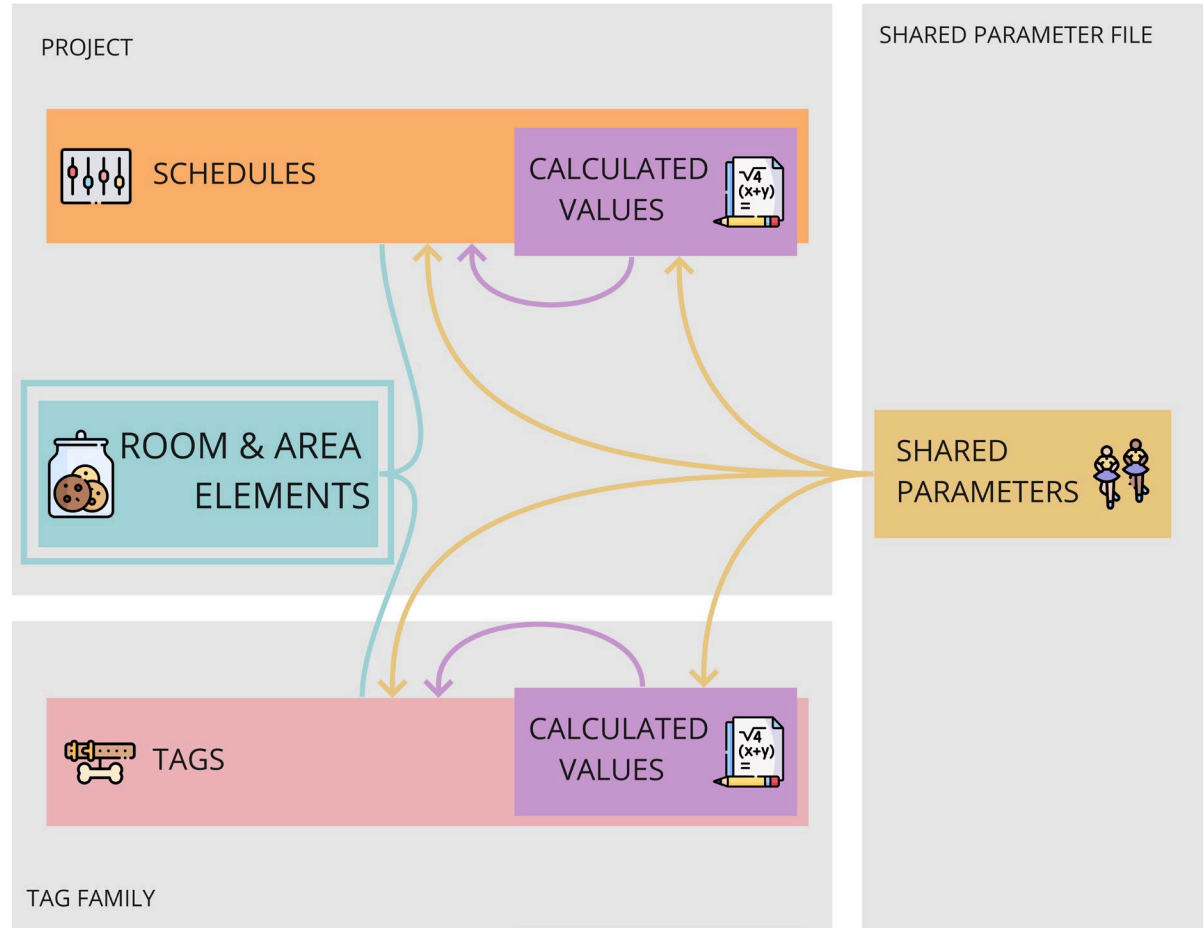

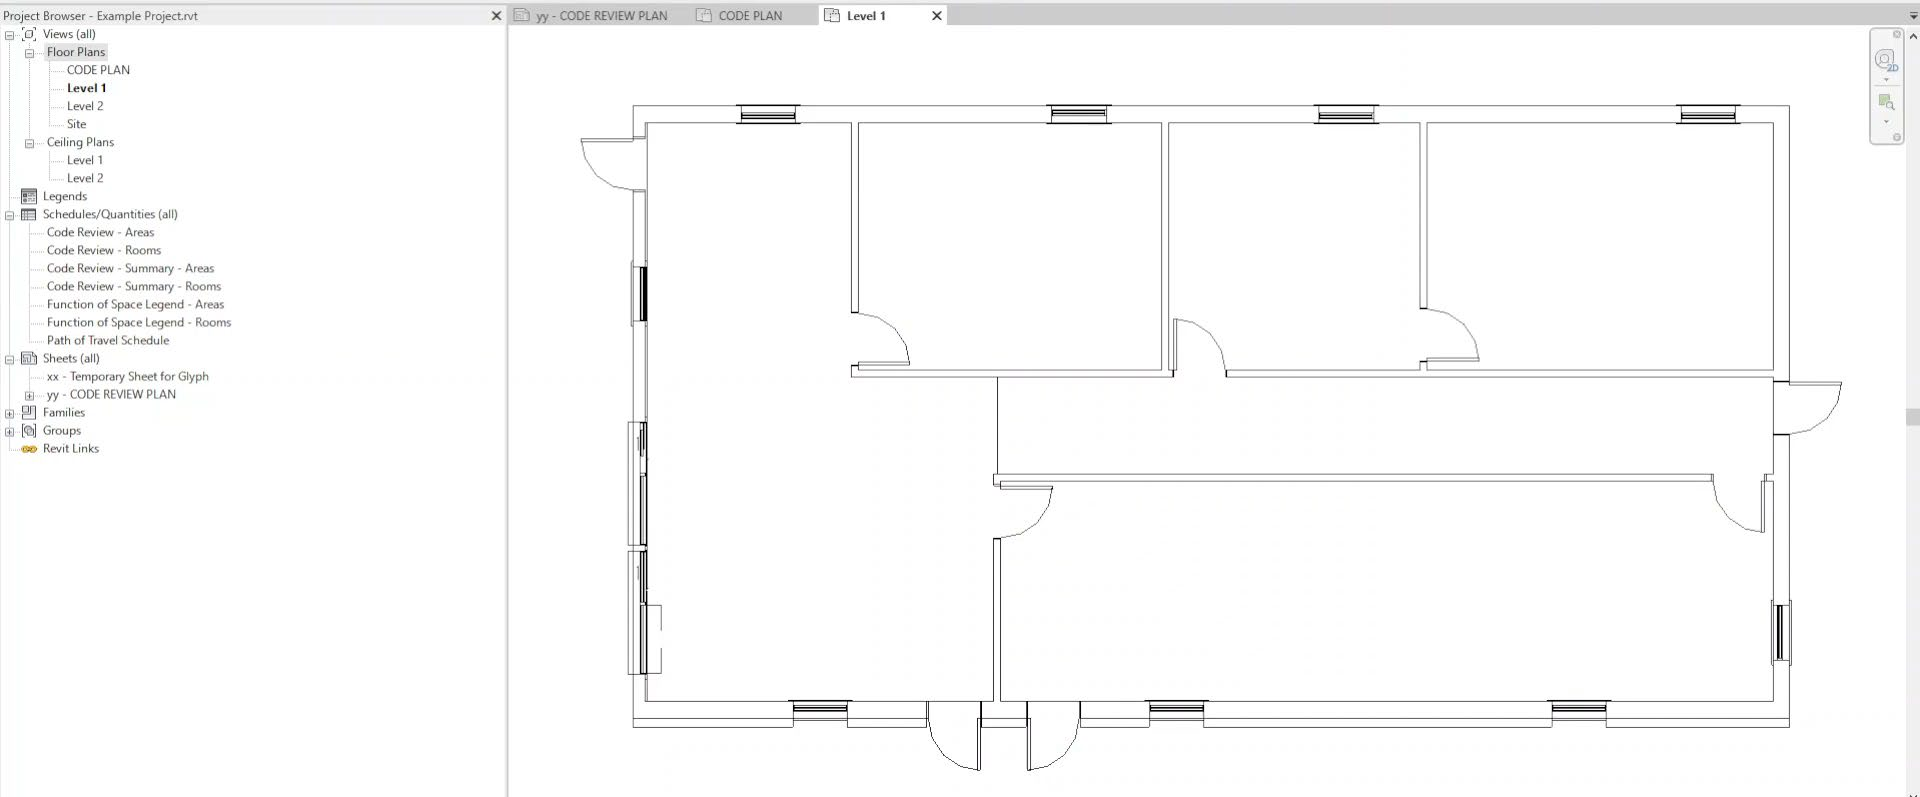

A close-up, black and white photograph of a highly reflective, woven mesh or fabric texture. The mesh is composed of many small, rounded, interconnected elements that create a complex, three-dimensional pattern. The lighting highlights the glossy surface, creating bright reflections and deep shadows that emphasize the texture. The image is partially obscured by a black diagonal shape that serves as a background for the text.

**How do
the Code Tools use
these Revit features?**

Room & Area Elements

- What are Rooms and Area Elements?
 - The cookie jar
- When to use each?
 - Rooms
 - Quicker
 - Uses walls & other elements
 - Areas
 - Versatile
 - Many types in same space

0.00	EGRESS*	0					

* - Egress value is not defined by the Maximum Floor Area Allowances Per Occupant table in Chapter 10, but an addition to help integrate those spaces in the Code Tools. These Spaces skip the standard process of defining the Number of Occupants by the Occupant Load Factor and instead has only a Cumulative Number Of Occupants based solely in the Number of Occupants Addition.
