

What's New in Autodesk® Revit® Structure 2013?

SE1485

Rebecca Frangipane

Structural Technician – KJWW Engineering Consultants
Instructor of Revit Structure course for CADLearning.com

Class Summary

Parts

- Division Profiles

- Merging and Excluding

Assemblies

- Types

- Origin

- Views

Reinforcing

- Hosted Area and Path

- Rebar Snapping

- Structural Wire Fabric

Analytical Model

- Analytical Links

- Openings

Other new “platform” features we have time for

Learning Objectives

At the end of this class, you will be able to:

- Divide parts with profiles, merge, and exclude parts.
- Place assembly origin accurately to easily swap types and create views on assembly orientation.
- Host area and path reinforcing and place structural wire fabric.
- Modify the analytical model with new analytical tools
